

# Legacy Quartz By StoneX USA Care Instructions

## **Maintaining your quartz is simple and easy**

- For every day cleaning use a soft sponge or dishcloth with warm water.
- For stubborn or greasy clean-ups use a gentle liquid cleaner like Mr. Clean, 409, Simple Green, Fantastic etc. or ordinary dish washing detergent e.g. Palmolive with warm water and a "White Scotch Brite" \*Also a Mr. clean Magic Eraser works wonderfully to remove a lot of stubborn spots\*
- Never use red or green Scotch Brites on Quartz as they contain aluminum oxide (the same abrasive in sand paper) and may dull Quartz finish.
- Do not use abrasive cleaning agents such as regular Comet and Ajax. If needed, Bon Ami and Bar keepers friend are both approved non abrasive cleaning powders that will clean without effecting your quartz finish.
- Though most common household cleaners have no effect on quartz, never allow your Quartz countertop to come in contact with drain cleaners, paint strippers or products containing Hydrofluoric acid, Methylene chloride, Trichloroethylene or any product with a very high or very low PH. These types of chemicals may etch or discolor the surface of your quartz.
- The Quartz is scorch resistant and under normal conditions is not affected. However, always use a trivet or hot pad between your quartz and any heat generating device including but not limited to crock pots, deep fryers, hot pots and pans or electric skillets. Sudden or rapid change of temperature or sustained heating, especially near edges and cut outs, may create enough thermal expansion energy to cause your countertop to crack. Damage caused by thermal expansion is not covered under our quartz warranty.

Follow these simple care and use guidelines and your Quartz countertop will provide you with many years of trouble free use
